Overall responsible for planning and execution of yearly inspection scope of all site safety critical components

Job aspects:

- Ensure close cooperation between Operations shifts, Business Team, Inspection and Process Engineering
 - Responsible for subcontracting and field execution
 - Responsible for on-site overhaul and testing of all safety critical devices in testing facility ExxonMobil
 - Ensure all local and legal requirements related to testing facility are met, including preparing and coordination of yearly external audit (NEN/ISO audit)
 - KPI reporting to Business Teams
-

Sep 2013 - Feb 2014

**TA Supervisor TA2013
Q8 Kuwait Petroleum Europoort**

TA 2013, KPE's largest TA in 40-years history.

Responsibilities:

- Supervision of mechanical scope of work / Daily reporting to Site Management / Signing off and issuing work permits (Area Leader permissions) / Apply more-less work procedure on a correct base / Monitor / correct contractor regarding quality of work / Reporting deviations related to quality of work

Oct 2011 - May 2014

Planner mechanical
Q8 Kuwait Petroleum Europoort

Project preparation & planning of Jetty 1 (Ocean Jetty) turnaround.

o Inspection of loading arms and replacement of hydraulic pumps/tubing

Realization of several maintenance projects at the refinery, from design to field execution:

o Retubes of floating heat exchangers / air fin coolers

o Replacement of several air fin heat exchangers

o Cleaning of exchanger trains combined with FSEC inspection of the bundles

o Chemical cleaning of several exchangers (shell side & tube side)

o Furnace decoking, including several vessels & lines

o Replacement of static constructions

o Overhaul relief valves & double block and bleed valves

Responsibilities:

- Ensure all safety requirements, technical specifications and user requirements are followed up
 - Responsible for creating a project implementation plan when project is planned for execution during SD/TA
 - Project execution within approved budget and planned operational or SD/TA window
 - Coordination with the departments Operations, Inspection, Logistics, Purchasing and Finance
 - Ensure all safety requirements are followed up (procedures/Task Risk Analyses/etc.)
-

Dec 2008 - Dec 2010

Project Coordinator
Alstom Power Service

Coordination of overhauls of gas- and steam turbines for several Dutch powerplant owners.

- Progress monitoring, planning and costs (calculation)
- Manpower planning
- Ensure site tools and equipment on site
- First contact person to the customer
- Responsible for implementation of scope of works in planning
- Organize site meetings with customer to discuss progress
- Finish projects with invoicing and back handover to Sales Department

Executed projects:

Construction Site Essent Claus C Powerplant

E.ON RoCa Plant, Rotterdam – Overhaul of steam turbine

Air Liquide, Rozenburg – Investigation steam turbine damage after crash and steam turbine repair

Elektrabel Power Plant, Nijmegen – Plasma sealing of ST Generator

Jan 2009 - Dec 2009

Site Coordinator
Alstom Power (Spain)

Site Coordination on the Greenfield Construction Site of the Essent Energy BV Claus C Powerplant, location Maasbracht, N, contracted under Alstom Spain

Project scope includes new gas turbines (3x 280 Mw) and the retrofit of existing steam turbine (435 Mw)

I was the focal point between Alstom and the end customer (Essent) regarding all operational aspects as subcontracting, planning, local regulations, etc.
